Status and Conservation of Bio-Diversity in North East India

The present book on Status and Conservation of Biodiversity in North East India is the outcome of National Conference on recent Trends in Biodiversity Researchers under the SAP activities of UGC. The book contains selected 34 chapters related to status and conservation of Biodiversity. North Eastern region of India is one of Hot-spot of Biodiversity centre. A number of rare and endemic species of flora and fauna have been reported. The selected research papers deal on aspects like Assessment of Biodiversity of microbes, plants and animals. Ethnic and Religious along with modern ways of conservation, pollution and habitat destructions. Modelling and prediction of diversity. United Nations has declared 2010 as the international year of Biodiversity with an emphasis on many species and one planet with the slogan Biodiversity is life and Biodiversity is our life.

The strength of this book is the simplicity and clarity of authenticated researches related to Biodiversity. The book may be immensely useful for the students, researchers, scientists and faculty members of Life Science, Ecology. Environmental Science, Forestry, Biodiversity, Zoology, Botany and Agriculture departments as a reference book for Natural Scientists.
